Originally published in 1992. This book brings together the work of a number of distinguished international researchers engaged in basic research on beginning reading. Individual chapters address various processes and problems in learning to read - including how acquisition gets underway, the contribution of story listening experiences, what is involved in learning to read words, and how readers represent information about written words in memory. In addition, the chapter contributors consider how phonological, onset-rime, and syntactic awareness contribute to reading acquisition, how learning to spell is involved, how reading ability can be explained as a combination of decoding skill plus listening comprehension skill, and what causes reading difficulties and how to study these causes.

The medication fact book is a comprehensive reference guide covering the most commonly prescribed medications in psychiatry. Composed of reader-friendly fact sheets and quick scan medication tables, this book offers key information on more than 100 of the most common medications clinicians use and are asked about in their practice.

Moving On to Key Stage 1 has been highly influential in developing innovative, developmentally appropriate KS1 practice in schools across the country. This new edition offers teachers further powerful and persuasive arguments for continuing play-based learning into Year 1 and 2. This new edition contains: iBrand new research identifying the current concerns of teachers in KS1 and setting these in the context of the current (school readiness) agenda iAn updated chapter on how children learn most naturally age 5-7 years and how to capitalise on this iA revised chapter on play, which draws on teacher views about its benefits for KS1 children and the barriers they face in incorporating it into their practice iA new chapter offering messages from headteachers advocating a play-based approach, and providing examples of how it has raised standards iA fresh consideration of how to balance adult-led and child-led learning and the role of the teacher in supporting both The author has a deep understanding of the challenges facing teachers in developing this fusion of pedagogies, and this book offers every reader principled and inspiring ways of meeting these challenges with success. Julie Fisher is an independent Early Years Adviser and Visiting Professor of Early Childhood Education at Oxford Brookes University, UK. She has been Headteacher of two schools, a University lecturer and a Local Authority Lead Adviser for Early Years.

Winner of the prestigious UK Literacy Association Academic Book Award for 2015 in its original edition, this fully revised edition of Learning to be Literate uniquely analyses research into literacy from the 1960s through to 2015 with some surprising conclusions. Margaret Clark explores the argument that young children growing up in a literate environment are forming hypotheses about the print around them, including environmental print, television, computer games and mobile phones. In a class where no child can yet read there is a wide range of understanding with regards to concepts of print and the critical features of written language. While to any literate adult, the relationship between spoken and written language may be obvious, young children have to be helped to discover it. This persuasive argument demonstrates the value of research in order to make informed policy decisions about children's literacy development. Accessible and succinct, Professor Clark's writing brings into sharp focus the processes involved in becoming literate. The effect on practice of many recent government policies she claims run counter to these insights. The key five thematic sections are backed up with case studies throughout and include: Insights from Literacy Research: 1960s to 1980s Young Literacy Learners: how we can help them Curriculum Developments and Literacy Policies, 1988 to 1997: a comparison between England and Scotland Synthetic Phonics and Literacy Learning: government policy in England 2006 to 2015 Interpretations of Literacy in the Twenty-first Century

Why do we assess reading? What do we assess when we assess reading? How, where, and when do we assess reading? Reading instruction and assessment expert Peter Afflerbach addresses these questions and much more in the 3rd edition of Understanding and Using Reading Assessment, K12. Using the CURRV model to evaluate reading assessment methodsincluding reading inventories, teacher questioning, performance assessment, and high-stakes reading testsAfflerbach considers the consequences and usefulness of each method, the roles and responsibilities of key stakeholders, and the reliability and validity of the assessments. In addition, he examines four important but often overlooked aspects of reading assessment: iAssessment accommodation for English-language learners and students with special needs iAssessment of noncognitive aspects of reading, such as motivation, engagement, self-concept, and self-efficacy iThe use of formative and summative assessment iThe importance of self-assessment in building reading independence The book provides detailed case studies from all grade levels to illustrate reading assessment done well. It also includes 15 reproducible forms and checklists that teachers and administrators can use to optimize their reading assessment efforts. Students are expected to read increasingly complex texts and to complete increasingly complex reading-related tasks to demonstrate their growth as readers. This book offers teachers and administrators alike a clear path to helping students meet those expectations. This book is a co-publication of ASCD and I.A. New to the 3rd edition: iNew chapter iFormative and Summative Assessment i Three significantly revised chapters:Performance Assessment; Assessment Accommodation for English Learners and Students With Special Needs (iAccommodation and Reading Assessment: in 2nd edition); Assessing the Other: Important Noncognitive Aspects of Reading i Fifteen reproducible and downloadable forms and checklists

Given the current context of the experience of migration on schools in England and Europe, and the competing policies and approaches to social integration in schools, there is a need to understand the connection between language development and social integration as a basis for promoting appropriate policies and practices. This volume explores the complex relationship between language, education and the social integration of newcomer migrant children in England, through an in-depth analysis of case studies from schools in the East of England. The authors set this evidence against the background of policy debates in the wider international setting, including a critical discussion of assumptions underlying national narratives of mainstreaming and assimilation. In the light of an absence of national guidelines for appropriate practice in schools, the authors outline a model of inclusive pedagogy for English as an additional language (EAL) and a framework of home-school communication to promote effective EAL parental engagement in schools.
