Covers the Cambridge IGCSE syllabus (0455) and the Cambridge O Level syllabus (2281), first examination from 2020. Economics relates to every aspect of our lives, from the decisions we make as individuals to the structures created by governments and firms. Thinking like an economist can help us all make better choices. With exam-style questions and specific skills practice, this revision guide helps students build their knowledge and understanding of economic theory, giving them confidence to achieve their potential in examinations. Answers are at the back of the book so that students are free to self-study.

This is the first book to provide a precise description of how companies can put purpose into practice. Based on groundbreaking research undertaken between Oxford University and Mars Catalyst, it offers an accessible account of why corporate purpose is so important and how it can be implemented to address the major challenges the world faces today.

This book provides the most comprehensive treatment to date of microeconometrics, the analysis of individual-level data on the economic behavior of individuals or firms using regression methods for cross section and panel data. The book is oriented to the practitioner. A basic understanding of the linear regression model with matrix algebra is assumed. The text can be used for a microeconometrics course, typically a second-year economics PhD course; for data-oriented applied microeconometrics field courses; and as a reference work for graduate students and applied researchers who wish to fill in gaps in their toolkit. Distinguishing features of the book include emphasis on nonlinear models and robust inference, simulation-based estimation, and problems of complex survey data. The book makes frequent use of numerical examples based on generated data to illustrate the key models and methods. More
