Building Code Requirements and Specification for Masonry Structures contains two standards and their commentaries: Building Code Requirements for Masonry Structures designated as TMS 402-16 (and formerly designated as TMS 402/ACI 530/ASCE 5) and Specification for Masonry Structures designated as TMS 602-16 (and formerly designated as TMS 602/ACI 530.1/ASCE 6). These standards are produced by The Masonry's Society's Committee TMS 402/602 and were formerly developed through the joint sponsorship of The Masonry Society (TMS), the American

Read Free Aci 530 530 1 11 Building Code

Concrete Institute (ACI), and the Structural Engineering Institute of the American Society of Civil Engineers (SEI/ASCE) through the Masonry Standards Joint Committee (MSJC). In late 2013, ACI and ASCE relinquished their rights to these standards to TMS who has served as the lead sponsor of the Standards for a number of years. Since then, the Committee has operated solely under the sponsorship of The Masonry Society, and the Committee's name, and the names of the standards, were re-designated. The Code covers the design and construction of masonry structures while

Read Free Aci 530 530 1 11 Building Code

the Specification and is concerned with minimum construction requirements for masonry in structures. Some of the topics covered in the Code are:

definitions, contract documents; quality assurance; materials; placement of embedded items; analysis and design; strength and serviceability; flexural and axial loads; shear; details and development of reinforcement; walls; columns; pilasters; beams and lintels; seismic design requirements; glass unit masonry; veneers; and autoclaved aerated concrete masonry. An empirical design

Read Free Aci 530 530 1 11 Building Code

method and a prescriptive method applicable to buildings meeting specific location and construction criteria are also included. The Specification covers subjects such as quality assurance requirements for materials; the placing, bonding and anchoring of masonry; and the placement of grout and of reinforcement. This Specification is meant to be modified and referenced in the Project Manual. The Code is written as a legal document and the Specification as a master specification required by the Code. The commentaries present background details,

only.

The Masonry Institute of
America believes that the
best way to extend and
improve the use of masonry
is through education and
dissemination of
information. Following a
long tradition of such
ideals, the 1997 Masonry
Codes and Specifications is
a ready reference that

Read Free Aci 530 530 1 11 Building Code

furnishes, in one document, the various code requirements for masonry from the Uniform Building Code and Standards, the California State Building Code, and the American Society for Testing and Materials (ASTM) Standards that govern the specification of quality and testing of materials. The book includes Guide Specifications for masonry construction set forth in the CSI format with notes to the specifier.

The quality and testing of materials used in construction are covered by reference to the appropriate

Read Free Aci 530 530 1 11 Building Code

ASTM standards And

specifications. Welding of reinforcement is covered by reference to the appropriate AWS standard. Uses of the Code include adoption by reference in general building codes, and earlier editions have been widely used in this manner. The Code is written in a format that allows such reference without change to its language. Therefore, background details or suggestions for carrying out the requirements or intent of the Code portion cannot be included. The Commentary is provided for this purpose. Some of the considerations of the

Read Free Aci 530 530 1 11 Building Code

Requirements And
committee in developing the Code portion are discussed within the Commentary, with emphasis given to the explanation of new or revised provisions. Much of the research data referenced in preparing the Code is cited for the user desiring to study individual questions in greater detail. Other documents that provide suggestions for carrying out the requirements of the Code are also cited.
