In Scouting ' s Guide to First Aid, current Scouts, Scout alumni, and readers interested in the outdoors are provided with time-tested advice on how to safely identify, harvest, and use edible wild plants. Some practical tips include: How to triage, assess, and identify medical emergencies What to include in a first aid kit for your home When to seek help for health emergencies How to safely move a sick or injured person How to perform CPR and use an automatic external defibrillator What the proper procedures are for broken bones, hypothermia, burns, and sprains And so much more! Since 1910, the Boy Scouts of America has helped build the future leaders of this country by combining educational activities and lifelong values with fun. The BSA is committed to training youth in responsible citizenship, character development, and self-reliance through participation in a wide range of outdoor activities.

A reprint of the first Boy Scouts handbook from 1911 covers woodcraft, camping, signs and signaling, first aid, chivalry, and games.

Be Prepared! Time-tested advice on emergency preparedness. An official publication of the Boy Scouts of America! Each year hundreds of outdoor enthusiasts find themselves in an unexpected outdoor emergency. They get lost, injured, or stranded. Cut off from the rest of the world, they have to depend upon their survival skills to survive. For most people, thanks to modern communications such as cell phones, satellite messengers, and personal locator beacons (PLB), it is merely a sobering two- or three-hour adventure. However, for some who did not take the proper precautions before they left home or do not have survival skills, it can end in tragedy. J. Wayne Fears uses his Army and Air Force training to make sure that everyone in the outdoors remembers the Boy Scout motto " Be Prepared. " His practical advice offers help with: How to build a fire How to purify water How to identify common edible plants and mushrooms How to signal for help How to build simple shelters Practical navigation skills And so much more! Since 1910, the Boy Scouts of America has helped build the future leaders of this country by combining educational activities and lifelong values with fun. The BSA is committed to training youth in responsible citizenship, character development, and self-reliance through participation in a wide range of outdoor activities.

This New York Times bestselling guide covers essential skills and strategies for surviving any catastrophe—from natural disasters to zombies attacks. How to Survive Anything covers situations ranging from the unexpected to the unthinkable, deftly balancing real-life survival know-how with wild scenarios that most likely won ' t ever happen. But, on the other hand, who would you rather have in your bunker? The guy who read up on killer robots or the one who didn ' t? The editors of Outdoor Life magazine cover everything from disaster preparedness to subsistence hunting and fishing, to which guns to use against the undead. After reading the expert advice in this manual, you ' ll be prepared for whatever this world throws at you.

Counteracting the panic and fear associated with getting lost in the wild, this handbook equips children with practical tools for overcoming adverse wilderness experiences, even if they are endured alone. Compiled by a search-and-rescue professional, straightforward advice is offered on building shelters and fires, signaling for help, finding water and food, dealing with dangerous animals, learning how to navigate, and avoiding injuries. Practice projects are included to hone survival skills--such as starting a fire with a reflective surface, casting animal tracks, or using a treasure hunt to test navigational aptitude. Making a strong argument for danger prevention, each lesson is coupled with simple instructions and diagrams that will reassure and empower young adventurers.

Outlines requirements for pursuing a merit badge in citizenship in the community.

É If my present reader happens to be a Boy Scout or a scout-master who wants the scouts to build a tower for exhibition purposes, he can do so by following the directions here given, but if there is real necessity for haste in the erection of this tower, of course we cannot build one as tall as we might where we have more time. With a small tower all the joints may be quickly lashed together with strong, heavy twine, rope, or even wire; and in the wilderness it will probably be necessary to bind the joints with pliable roots, or cordage made of bark or withes; but as this is not a book on woodcraft we will suppose that the reader has secured the proper material for fastening the joints of the frame of this signal-tower and he must now shoulder his axe and go to the woods in order to secure the necessary timber. First let him cut eight straight poles N that is, as straight as he can find them. These poles should be about four and one half inches in diameter at their base and sixteen and one half feet long. After all the branches are trimmed off the poles, cut four more sticks each nine feet long and two and a half or three inches in diameter at the base; when these are trimmed into shape one will need twenty six or seven more stout sticks each four and one half feet long for braces and for flooring for the platform.
