~~In Catching Breath, Kathryn Lougheed asks what has made Mycobacterium tuberculosis such a successful bacterium, and how we can use this knowledge to consign it to the history books. We follow its path through the ages, from its time gathering strength as a latent infection of hunter-gatherers to its rise alongside human urbanisation and industrialisation, and learn just how connected human history is to TB - from an Ancient Egyptian murder mystery and the rumours of the first vampires to a ...~~

~~Catching Breath: The Making and Unmaking of Tuberculosis~~

About Catching Breath. Tuberculosis is an ancient disease, but it's not a disease of history. With more than a million victims every year – more than any other disease, including malaria – and antibiotic resistance now found in every country worldwide, tuberculosis is once again proving itself to be one of the smartest killers humanity has ever faced.

~~Catching Breath: The Making and Unmaking of Tuberculosis~~

Catching Breath: The Making and Unmaking of Tuberculosis. Tuberculosis (TB) is the leading infectious disease cause of death worldwide, yet many persons in industrialized countries think TB is mainly a historical curiosity or a rare disease only affecting a few uniquely vulnerable persons. This paradox is the inspiration for Kathryn Lougheed 's book, Catching Breath: The Making and Unmaking of Tuberculosis (Figure).

~~Amazon.co.uk: Customer review: Catching Breath: The Making~~

Catching Breath follows the history of TB through the ages, from its time as an infection of hunter-gatherers to the first human villages, which set it up with everything it needed to become the monstrous disease it is today, through to the perils of industrialization and urbanization. It goes on to look at the latest research in fighting the disease, with stories of modern scientific research, interviews with doctors on the TB frontline, and the personal experiences of those affected by the ...

Part 1: Trigger pointsThe effects of muscle " knots " on breathing. Trigger points — better known as muscle knots — can cause shortness of breath. They are small patches of sensitive muscle tissue, maybe caused by a " micro cramp, " or possibly neurological hypersensitivity. Trigger points are a big, tricky topic.
