The Rolls Royce-Continental O-240 was 130hp and carburetted - found most commonly in Reims-Cessna FRA150Ls and Ms (F = French, R = RR O-240, A = Aerobat). They were also fitted in Rollason Condors. The IO-240 is a 'modern' injected Continental engine found in the Katanas (Americans didn't accept the Rotax 912 powered examples) and more recently, the IO-240F (125hp) is found in the front of the Liberty XL (F = FADEC).

Continental IO-240 - PPRuNe Forums

Our advanced TCM Continental O-240-A engine shop with experienced EASA Part 145-authorized engineers are the hub of our service-overhauling and repairing light aircraft engines such as TCM Continental, TCM Teledyne Continental, Franklin and others for UK and international customers.

This thesis describes some of the processes and results obtained during the design and prototyping of a single seat experimental aircraft. The major aim was to maximise the Triaviation score of the aircraft. This score is a combination of the top speed, the stall speed and the rate of climb. The aircraft has been designed constructed, inspected and flown. The process of designing and prototyping is outlined in this thesis. Details are provided regarding preliminary design, numerical optimisation and the process of building the prototype. The aircraft registered VH-ZYY is a shoulder wing monoplane using a Continental IO-240 aircraft engine. The aircraft has a high power to weight ratio and light wing loading to assist it to climb well and fly slowly. Full span flaperons are used to increase the maximum coefficient of lift at the stall. The primary structure is aluminium with a carbon fibre and nomex cored cowl. All steel components have been formed with 4130 chrome molybdenum aircraft grade tubing. All hardware uses AN specification parts. VH-ZYY is registered in Australia as an Experimental aircraft.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.
