Todaro and Smith believe that development economics should foster a student's ability to understand real problems faced by developing countries. Unlike other texts, Economic Development introduces economic models within the context of countries and issues, so that students learn to analyze and engage in the ongoing policy debates. Praised for its even, balanced coverage, the text helps students to evaluate issues using the best available cross-sectional data, economic theory, and institutional and structural perspectives. Keeping pace with current data and events, the Ninth Edition includes the latest research in development as well as extensive country-specific examples of topics such as transition economics and urban policy. - Reorganization from four parts to three provides a more streamlined sequencing for economic development courses. - All new country case studies target pertinent issues, such as Divergent Development: Pakistan and Bangladesh and Understanding a Development Miracle: China. Thoroughly updated and revised comparison case studies provide the most current illustrations of policy and its outcomes. major development organizations. - New research on rural development economics and the green revolution in Chapter 9. - Extended coverage of non-governmental organizations and how they compare with government and private sectors in Chapter 11, Political Economy and the Roles of Market. - Chapter 14 takes a critical look at the World Bank and the burden of debt.

This is the United Nations definitive report on the state of the world economy, providing global and regional economic outlook for 2020 and 2021. Produced by the Department of Economic and Social Affairs, the five United Nations regional commissions, the United Nations Conference on Trade and Development, with contributions from the UN World Tourism Organization and other intergovernmental agencies.

Over 800 million people suffer from chronic hunger, and over ten million children die each year from preventable causes. These may seem like overwhelming statistics, but as Stephen Smith shows in this call to arms, global poverty is something that we can and should solve within our lifetimes. Ending Global Poverty explores the various traps that keep people mired in poverty, traps like poor nutrition, illiteracy, lack of access to health care, and others and presents eight keys to escaping these traps. Smith gives readers the tools they need to help people overcome poverty and to determine what approaches are most effective in fighting it. For example, celebrities in commercials who encourage viewers to "adopt" a poor child really seem to care, but will sending money to these organizations do the most good? Smith explains how to make an informed decision. Grass-roots programs and organizations are helping people gain the capabilities they need to escape from poverty and this book highlights many of the most promising of these strategies in some of the poorest countries in the world, explaining what they do and what makes them effective.

This book outlines and analyzes the economic development of China between 1949 and 2007. Rather than being narrowly economic, the book addresses many of the broader aspects of development, including literacy, morality, demographics and the environment. The distinctive features of this book are its sweep and that it does not shy away from controversial issues. For example, there is no question that aspects of Maoism were disastrous but Bramall argues that there was another side to the whole programme. More recently, the current system of government has presided over three decades of very rapid economic growth. However, the author shows that this growth has come at a price. Bramall makes it clear that unless radical change takes place, Chinese growth will not be sustainable. This large, comprehensive text is relevant to all those studying the economic history of China as well as its contemporary economy. It is also useful more generally for students and researchers in the fields of international and development economics.

This book examines general Nongovernmental organizations (NGOs) roles and comparative advantages in the broad fight to end global poverty, as well as roles and opportunities specific to particular Millennium Development Goals sectors.

With more than 300,000 copies in print, When Helping Hurts is a paradigm-forming contemporary classic on the subject of poverty alleviation. Poverty is much more than simply a lack of material resources, and it takes much more than donations and handouts to solve it. When Helping Hurts shows how some alleviation efforts, failing to consider the complexities of poverty, have actually (and unintentionally) done more harm than good. But it looks ahead. It encourages us to see the dignity in everyone, to empower the materially poor, and to know that we are all uniquely needy—and that God in the gospel is reconciling all things to himself. Focusing on both North American and Majority World contexts, When Helping Hurts provides proven strategies for effective poverty alleviation, catalyzing the idea that sustainable change comes not from the outside in, but from the inside out.

... this volume is a very good and important addition to economic growth and development. On the basis of authority, the selection is well-balanced. ... This book should be a mandatory textbook for graduate students in development economics, and essential reading for all policy-makers. Voxi Heinrich Amavilah, Progress in Development Studies This valuable and engaging new book bears eloquent testimony to A.P. Thirlwall's substantial contribution to economics over the last 40 years. The volume does not attempt to provide a comprehensive review of such a prolific figure, but rather demonstrates the considerable influence that his work on economic theory has had on his contemporaries, and the profession as a whole. From his early pioneering research in regional and labour economics to his more recent exploration of growth and development economics, leading experts in the field bear witness to the significant role he has played in the evolution of the discipline. In addressing some of the most pivotal aspects of his career, the contributors cover a range of topics including Thirlwall's Law, the application of Keynesian macroeconomic approaches, the General Theory within open economies, the connection between short-run cycles and long-run growth, endogenous growth theory, the Stability and Growth Pact, as well as broader development issues and problems. In championing Thirlwall's challenging work, this volume provides a lively and comprehensive account of some of the most important areas of economics today. This book will prove an essential read for academics and policy makers alike who are interested in trade, growth and development economics.

The economic and social development of the world 's poorest countries, and the eradication of primary poverty, is one of the greatest challenges facing the world. This tenth edition of Tony Thirlwall 's classic textbook Economics of Development, now co-written with Pen élope Pacheco-L ópez, provides a clear, comprehensive and rigorous introduction to the theory ofdevelopment economics and the experience of developing countries. Highlights of the new edition include: • A brand new chapter on human capital: education, nutrition, health, and the role of women in development • New material on the Sustainable Development Goals, the measurement of poverty, and the multidimensional poverty index • Discussion of randomized control trials • The role of structural change in economic development • New IMF lending facilities An ideal textbook for students of economics and other social sciences, this edition contains up-to-date statistics and data, case examples and website references. A companion website is available at www.palgravehighered.com/Thirlwall-Econ-Of-Dev-10e, which includes PowerPoint slides for lecturers, as well as web links to additional resources and videos on development issues. ' The first edition of this classic text was in 1972, now in 2017 we have a tenth edition. No scholarly work survives for almost half a century without continuing to be current, relevant and authoritative; a considerable task in our fast changing world. Edition number 10 does not disappoint, and will continue to be of great value to current generations of students interested in the economics of development. It is stimulating, informative and comprehensive; as with previous editions, it also maintains rigour whilst continuing to be accessible. ' – Sir David Greenaway, University of Nottingham, UK ' Economics of Development is by far the best undergraduate textbook in development economics. The new edition expands coverage of the material to include important and relevant topics such as the Sustainable Development Goals, multidimensional poverty, health and nutrition, microcredit, climate change and randomised control trials, and should be an essential reference for students and scholars alike. ' – Kunal Sen, University ofManchester, UK ' Successive editions of Tony Thirlwall 's textbook on the economics of development have become classic guides to the subject – comprehensive, clear and dispassionate. This updated edition is again outstanding, an essential contemporary introduction to the topic. ' – Frances Stewart, University of Oxford, UK ' This splendid book, which has gone from strength to strength through ten comprehensive editions, is unquestionably the finest available introduction to the challenging and ever-evolving subject of economic development. ' – Prame-chandra Athukorala, Australian National University, Australia A.P. THIRLWALL is Professor of Applied Economics at the University of Kent, UK. He has lectured widely in developing countries and has been a consultant to several international development agencies. He has also written a number of other books in the field of growth and development, and is Series Editor of Great Thinkers in Economics, published by Palgrave Macmillan. PEN É LOPE PACHECO-L ÓPEZ teaches economics at the University of Kent, UK, and has been Consultant to the United Nations Conference on Trade and Development (UNCTAD), the International Trade Centre, and the United Nations Industrial Development Organization (UNIDO). With A.P. Thirlwall she is co-author of Trade Liberalization and the Poverty of Nations.

This book offers a socio-historical analysis of migration and the possibilities of regional integration in Southern Africa. It examines both the historical roots of and contemporary challenges regarding the social, economic, and geo-political causes of migration and its consequences (i.e. xenophobia) to illustrate how ' diaspora ' migrations have shaped a sense of identity, citizenry, and belonging in the region. By discussing immigration policies and processes and highlighting how the struggle for belonging is mediated by new pressures concerning economic security, social inequality, and globalist challenges, the book develops policy responses to the challenge of social and economic exclusion, as well as xenophobic violence, in Southern Africa. This timely and highly informative book will appeal to all scholars, activists, and policy-makers looking to revisit migration policies and realign them with current globalization and regional integration trends.
