Economic growth is an increase in the production of goods and services in an economy. Increases in capital goods, labor force, technology, and human capital can all contribute to economic growth.

~~Economic Growth Definition~~

The Phases of Economic Growth . Analysts watch economic growth to discover what stage of the business cycle the economy is in. The best phase is expansion. This is when the economy is growing in a sustainable fashion. If growth is too far beyond a healthy growth rate, it overheats. That creates an asset bubble. This is what happened to the housing sector in 2005-2006.
