This book is a step in the direction of giving an Indian perspective for understanding the world of fabrics. Organised in seven parts, the book adopts a systematic approach in defining and exploring the concepts of fabric science. Part I (Fundamentals) discusses the history, composition, classification and properties of textile fibres. Part II (Fibres) focuses on the typical traits of the fibre family. Part III (Yarns) deals with yarn production and properties. Part IV (Fabrics) covers weaving, knitting and other methods of fabric construction. Part V (Finishing) highlights the colouration and functional finishes of any fabric. Part VI (Consumer Concerns) is aimed at enhancing consumer satisfaction by generating awareness among consumers regarding selection, care and maintenance and vital topics like blending and defects. Part VII (Miscellaneous concepts)—guides students on career opportunities related to this course. KEY FEATURES □ Relevant illustrations and images to help in grasping the steps of fabric construction. □ Chapter-end exercises aimed at testing the factual knowledge, understanding and application of the concepts. □ Simple examples from day-to-day life to instil a sense of curiosity in the reader's mind to know more about the intriguing world of textiles. NEW TO THE FOURTH EDITION While maintaining organization of the book and its hallmark features—simple no-frills writing style and engaging pedagogy—the fourth edition introduces: □ Two new chapters on 'Blending' and 'Defects' in Part VI; both areas are of concern for consumers. □ A new chapter on 'Sustainability' in Part VII on demand of Civil Service aspirants and today's eco-conscious times. This fourth volume in the series presents various sustainable approaches in the textile and fashion sector with a focus on manufacturing processes and chemicals. Sustainability is one of the important aspects in today's industrial context, which is followed by every industrial sector with no exception to textiles and fashion. Sustainability and strict adherence to the principles of sustainability has become as one of the essential needs again for any industrial sector including textiles and fashion. There are countless measures in terms of various approaches to make the textiles and fashion sector sustainable. These measures, but not limited to, ranging from innovating and implementing new fibres and raw materials, introducing innovative manufacturing methods, chemicals, processes to focus on all the possible stages of a textile product's life cycle from cradle to grave. These approaches include making the textiles and fashion sector circular and also development of new products from sustainable raw materials/processes or combination of both.

The International Conference on Phytochemistry, Textile, & Renewable Energy Technologies for Sustainable Development (ICPTRE 2020) was hosted by the World bank funded Africa Centre of Excellence in Phytochemicals, Textile and Renewable Energy (ACEII-PTRE) based at Moi University in conjunction with Donghua University, China and the Sino-Africa International Symposium on Textiles and Apparel (SAISTA). The theme of the conference was Advancing Science, Technology and Innovation for Industrial Growth. The research relationships between universities and industry have enabled the two entities to flourish and, in the past, have been credited for accelerated sustainable development and uplifting of millions out poverty. ICPTRE 2020 therefore provided a platform for academic researchers drawn from across the world to meet key industry professionals and actively share knowledge while advancing the role of research in industrial development, particularly, in the developing nations. The conference also provided exhibitors with an opportunity to interact with professionals and showcase their business, products, technologies and equipment. During the course of the conference, industrial exhibitions, research papers and presentations in the fields of phytochemistry, textiles, renewable energy, industry, science, technology, innovations and much more were presented.

Over a million students have transformed adequate work into academic achievement with this best-selling text. HOW TO STUDY IN COLLEGE sets students on the path to success by helping them build a strong foundation of study skills, and learn how to gain, retain, and explain information. Based on widely tested educational and learning theories, HOW TO STUDY IN COLLEGE teaches study techniques such as visual thinking, active listening, concentration, note taking, and test taking, while also incorporating material on vocabulary building.
