Sears started selling Silvertone radios around the early 1920s. After the success of the radios, Sears also began selling tubes and batteries for the Silvertone radio line. The radios became very popular during WWII in the 1940s as people wanted to know about the war. Sears released the Silvertone radio antenna and wind generators to help power the radios. Sears Silvertone radios produced in the 1920s and throughout the 1940s are considered collectible vintage radios.

Look for round dials, many with the image of a globe or the word “Silvertone” inscribed on the dial itself. These are indicative of dials made between 1931 and 1940 by Silvertone. The plates for dials during this time were less ornate and more streamlined. Later models also featured a rectangular dial with the word “Silvertone” written on it.
