 The MCB-201 is fitted with standard 3-pin XLR connectors for inputs and outputs, so hookup requires only standard mic cables. One input is provided with a REV/POL switch to change its polarity. This is very useful for correcting acoustical or electrical phase cancellation problems such as poor mic placement and miswired cables.

 The S200 M UC range of miniature circuit-breakers features permanent magnets on the internal arcing chutes able to extinguish an electric arc of up to 500 V DC with Icu = 4.5 kA, thus ensuring flexible control of both direct and alternating currents. Ideal for industry application because of the high breaking capacity of 10 kA.

Raised like a princess in one of the most powerful families in the American South, Henrietta Bingham was offered the helm of a publishing empire. Instead, she ripped through the Jazz Age like an F. Scott Fitzgerald character: intoxicating and intoxicated, selfish and shameless, seductive and brilliant, endearing and often terribly troubled. In New York, Louisville, and London, she drove both men and women wild with desire, and her youth blazed with sex. But her love affairs with women made her the subject of derision and caused a doctor to try to cure her queerness. After the speed and pleasure of her early days, the toxicity of judgment from others coupled with her own anxieties resulted in years of addiction and breakdowns. And perhaps most painfully, she became a source of embarrassment for her family—she was labeled “a three-dollar bill.” But forebears can become fairy-tale figures, especially when they defy tradition and are spoken of only in whispers. For the biographer and historian Emily Bingham, the secret of who her great-aunt was, and just why her story was concealed for so long, led to Irrepressible: The Jazz Age Life of Henrietta Bingham. Henrietta rode the cultural cusp as a muse to the Bloomsbury Group, the daughter of the ambassador to the United Kingdom during the rise of Nazism, the seductress of royalty and athletic champions, and a pre-Stonewall figure who never buckled to convention. Henrietta's audacious physicality made her unforgettable in her own time, and her ecstatic and harrowing life serves as an astonishing reminder of the stories lying buried in our own families.

Spaceflight is a rational undertaking, yet full of emotions. It is a dream of mankind and a multi-billion industry likewise. It is subject to a distinct branch of law – and moreover part of modern pop culture. In short: spaceflight is fascinating. “Outer Space in society, politics and law” is an inter-disciplinary approach to the understanding of modern space law. Technical, cultural and historical aspects lay the foundation for a sound comprehension why space law norms have been established and what they mean in practice. The reader will realize the impact space and spaceflight have on society – from Stonehenge to climate change. A new approach to presenting space law: comprehensive and illustrative. “We live in a society absolutely dependent on science and technology and yet have cleverly arranged things so that almost no one understands science and technology. That's a clear prescription for disaster.” Carl Sagan

A historical chronology of the U.S. Navy Seabees in Vietnam during 1969. Data was researched from Battalion Cruisebooks and Deployment Completion Reports, Stars & Stripes Newspaper, All Hands magazine as well as personal stories and memories from the men who served 'boots on the ground'

The idea of a joint ESO / Australia meeting on the large number of exciting new facilities that are, or will soon be, available tihne southern hemisphere arose quite naturally. In the optical and the near-infrared, the Very Large Telescope (VLT) will soon be operational. In the radio, the Australia Telescope Compact Array is going to be upgraded to higher frequencies (20 and 100 GHz), together with an improvement in very long baseline interferometry (VLBI) facilities. Other major facilities, such as the Large Millimetre Array and the SKA are being planned. Moreover, new deep surveys are underway in the southern hemisphere: the southern Hubble Deep Field, the ESO Imaging Survey (BIS), pan oramic deep surveys with the UK Schmidt telescope, and the Anglo-Australian Telescope (AAT) 2dF galaxy/QSO redshift survey in the optical; and the Parkes multibeam HI survey and Molonglo Observatory Synthesis Telescope (MOST) Wide Field continuum survey at radio wavelengths. With all these new facilities, important progress will be made regarding important issues such as the large scale structure of the universe, the very early universe and the associated first epoch of galaxy formation. The generation of large databases, and the opportunity for sensitive follow-up observations in complementary wavebands, mean that coordinated radio, infrared and optical projects in the southern hemisphere are likely to become increasingly attractive and important.

A multidisciplinary analysis of sectarianism and bigotry in Scottish football Sectarianism and bigotry are among the most publicly debated issues in Scotland, often reported in the newspapers as the "e;shame"e; of Scotland's national game. The current crisis in Scottish football includes high profile controversies and disorder related to bigotry and sectarianism which resulted in new legislation to tackle offensive behaviour in and beyond football grounds. In this collection, contributors from a range of disciplinary positions present the latest empirical research evidence and social theory to examine and debate fundamental issues about bigotry in Scottish football and society. The topic has raised many questions. How should sectarianism and bigotry be defined and understood? What are the experiences and impacts of bigotry on different populations in Scotland? Are recent events unique or do they have historic precedents and contemporary comparisons beyond Scotland? What should be the response of government, football authorities, clubs, football supporters and other institutions and organisations in Scotland regarding legislation? What vision should we have for a future Scottish society and its diverse population? Bigotry, Football and Scotland will appeal to all those interested in Scotland's national game, the role of football in the 21st Century and how multicultural contemporary societies attempt to resolve prejudice and promote diversity.

Some say Christianity is white man's religion. . . . And it is true that there is a long and ugly history of abuse of African-Americans at the hands of Anglo Christians. Afrocentric interpretations of history often point to slavery, lynchings and the like as proof that Christianity is inherently antiblack. But Craig Keener and Glen Usry contend that Christianity can be Afrocentric. In this massively researched book, they show that racism is not unique to Christianity. More important, they show how "world history is also our history and the Bible is also our book." Black Man's Religion is one of the first of its kind, a pro-Christian reading of religion and history from a black perspective. Fascinating and compelling, it is must reading for all concerned for African-American culture and issues of faith.
