[Documentation.](#) This website contains the latest, most up to date version of the documentation. In general we hope the documentation here is accurate and makes reference to specific version compatibility issues, but we know this isn't always true. In some cases it may be valuable to refer to the documentation written for your specific driver version. [HEAD; 42.x Download - postgresql-jdbc-head ...](#)

### PostgreSQL JDBC Documentation

psql is a terminal-based front-end to PostgreSQL. It enables you to type in queries interactively, issue them to PostgreSQL, and see the query results. Alternatively, input can be from a file.

### PostgreSQL: Documentation: 9.2: psql

[Use pandoc, not lynx, for generating plain-text documentation output files \(Peter Eisentraut\)](#) This affects only the INSTALL file generated during make dist and the seldom-used plain-text postgres.txt output file. Pandoc produces better output than lynx and avoids some locale/encoding issues. Pandoc version 1.13 or later is required.

Client authentication is controlled by a configuration file, which traditionally is named pg\_hba.conf and is stored in the database cluster's

data directory. (HBA stands for host-based authentication.) A default `pg_hba.conf` file is installed when the data directory is initialized by `initdb`. It is possible to place the authentication configuration file elsewhere, however; see the `hba_file` ...

Getting Started. The best way to use `Npgsql` is to install its nuget package.. `Npgsql` aims to be fully ADO.NET-compatible, its API should feel almost identical to other .NET database drivers.

Documentation | `Npgsql` Documentation

Description. The `NOTIFY` command sends a notification event together with an optional “ payload ” string to each client application that has previously executed `LISTEN` channel for the specified channel name in the current database. Notifications are visible to all users. `NOTIFY` provides a simple interprocess communication mechanism for a collection of processes accessing the same PostgreSQL ...
