situations, is fully explored in this textbook. This text examines methodologies of the social sciences and questions how they can enable the task of theological reflection. They begin by tracing the development of practical theology as a discipline and comment on current methodological practices, and trace the movement from practical theology as applied theology, ie a discipline which simply takes data from the other theological disciplines (historical, systematic and biblical theology) towards a model which understands the practical theological task in terms of the theology of practice. The authors examine the relationship between qualitative and quantitative methods and highlight the significance of both for the task of practical theology. They also take the reader through the actual process of developing and carrying out a research project using the author's own research as case study examples. Case studies include: the rise in spirituality; the decline in church attendance, evidence-based medicine compared to needs-led assessments, the growth in chaplaincy and how it is understood as separate from parish ministry.

decades. This book provides a complete and original research primer in the major theories, approaches and methods at the cutting-edge of research in contemporary practical theology. It represents a reflection on the very practice of the discipline itself, its foundational questions and epistemological claims. Each chapter examines different aspects of the research process: starting with experience and practice, aspects of research design and epistemology, communities of learning, the influence of theological norms and tradition on the practice of research, and ethical considerations about what constitutes 'the good' in advanced research. The uniqueness of this book rests in its authoritative overview of current practical theological research across a range of traditions and approaches, combined with a comprehensive introduction to research methodology. It offers worked examples from the authors, their colleagues and research students that serve to illustrate key ideas and approaches in practical theological research. The four authors are all internationally-leading scholars and rank amongst the most influential figures in practical theology of their generation. The book promises to be of interest to students, teachers and researchers in practical theology, especially those looking to conduct original practice-based enquiry in the field.

This work by a leading figure in the field offers one of the first attempts to formulate a complete theory of practical theology for scholars, teachers, students, and those directly involved in pastoral ministry.. "Designed to serve as a reference tool, this volume provides the necessary theoretical discussion for work in the entire discipline of practical theology. Gerben Heitink first surveys the historical development of practical theology from the thought of Schleiermacher to the present. He then outlines the theoretical aspects of practical theology, looking especially at the hermeneutical, empirical, and strategic points of view. Finally Heitink discusses the various contexts in which practical theology takes place.

Qualitative research fits naturally within the field of practical theology as it delves deeper into the essence of human experience and the meaning of lived experiences. With a great diversity of data collection and analysis methods, it provides a wide spectrum of resources to evaluate, explore, and understand and address issues related to practice, context, and application of Christian faith to everyday life. It is highly flexible in dealing with multiple data
