defied expectations by breaking world records in downhill speed skiing, joining the CIA, and becoming a successful inventor, entrepreneur, and family man. He had never yearned for vision. Then, in 1999, a chance encounter brought startling news: a revolutionary stem cell transplant surgery could restore May's vision. It would allow him to drive, to read, to see his children's faces. He began to contemplate an astonishing new world: Would music still sound the same? Would sex be different? Would he recognize himself in the mirror? Would his marriage

survive? Would he still be Mike May? The procedure was filled with risks, some of them deadly, others beyond May's wildest dreams. Even if the surgery worked, history was against him. Fewer than twenty cases were known worldwide in which a person gained vision after a lifetime of blindness. Each of those people suffered desperate consequences we can scarcely imagine. There were countless reasons for May to pass on vision. He could think of only a single reason to go forward. Whatever his decision, he knew it would change his life. Beautifully written and thrillingly told,
